Experienced software engineer with a strong background in application development. Hands-on experience leading frontend development, from requirements definition and design to architecture, testing, and support.

Exceptional problem-solving skills, with involvement in various technology stacks and processes, building applications from scratch as well as maintaining and improving existing ones, whether in small startups or large enterprise systems.

Solid experience in:

- Frontend application development
- Software quality and performance optimization
- Developing sophisticated and extendable web applications from scratch
- Working with legacy code, refactoring code, migrating to new stack, reducing tech debts
- Software troubleshooting and fixing tricky defects
- Designing and configuring CI\CD project workflows
- Leading the team, interviewing candidates and mentoring newcomers

Stack:

My main stack is **JavaScript, TypeScript, Vue/Nuxt, AWS.**

- Expert in: Vue, Nuxt, JavaScript, TypeScript, RestAPI, WebSockets.
- Experience with: AWS, React, Redux, Next, React Native.
- API: RestAPI, OpenAPI, GraphQL
- Experience with (UI specific): Pixi.js, Three.js, GSAP
- Testing: Jest, Vitest, Cypress, Playwright.

Experience:

- **OneReach.ai** *(11.2019 - present)*

    TEAM LEAD, SOFTWARE ENGINEER

    Developed and maintained the OneReach automation platform, including the Bot Designer Studio. Contributed to the creation of a cross-platform chat solution Rich Web Chat (web, iOS, Android).

Stack: Vue.js, Typescript, Node.js, AWS, Playwright, Vitest

Responsibilities:

- Leading end-to-end project development from inception to deployment
- Conducting code reviews
- Interviewing candidates
- Managing teams and task allocation
- Providing mentorship
- Facilitating client communications and overseeing integration with internal services and products.

- **Vintage Web Production** *(01.2018 - 11.2019)*

  FRONT-END DEVELOPER

  Led the development of visually engaging websites, with a focus on implementing dynamic animations and "wow" effects to enhance user experience.

  Stack: ES6, Vue.js, Vuex, Nuxt, canvas, pixi.js, Three.js, SCSS, ESLint, stylelint.

  Responsibilities:

  - Develop new websites and single-page applications (SPAs) using Vue.js and Nuxt.js
  - Optimized websites for cross-browser compatibility, responsiveness, and fast load times
  - Maintain and enhance existing projects
  - Perform bug fixes
  - Collaborate closely with UI/UX teams and contribute to the growth and development of the front-end team.

- **Yabloko** *(04.2017 - 12.2017)*

  FRONT-END DEVELOPER

  Develop and maintain websites.

  Stack: HTML, CSS, ES5/6, canvas.

  Responsibilities:

  - Develop and implement HTML/CSS/JavaScript code for websites
  - Ensure accurate and consistent formatting
  - Collaborate with designers to translate mockups into functional web pages
  - Optimize HTML for performance and SEO
  - Assist with troubleshooting and bug fixes.

Education:

- **State University of Trade and Economics**
  Master's degree, Data science (2022 - 2024)
- **NTUU (KPI)**
  ENERGY ENGINEER (2012 - 2018)

Languages:

English - C1, Ukrainian - Native, Russian - Native.
